EDUCATION

Thapar Institute of Engineering and Technology

Bachelor of Engineering in Computer Engineering; **CGPA: 8.07/10**

Patiala, India

Aug 2023 – Jun 2027

Ahlcon Public School

CBSE Class XII; **Percentage: 92.2%**

Delhi, India

Apr 2022 - Mar 2023

Ahlcon Public School

CBSE Class X; **Percentage: 95.4%**

Delhi, India

Apr 2020 - Mar 2021

EXPERIENCE

Contributor

Aug. 2026 – Present

TrueForge by TrueFoundry

Remote

- Implemented **persisted chat deletion** in [PR #401](#), wiring UI controls to the session deletion API with confirmation flows and focused tests for destructive state changes.
- Hardened **Kubernetes deployments** in [PR #434](#) by enforcing **non-root execution**, **read-only root filesystems**, dropped Linux capabilities, secure Helm defaults, and automated chart security checks.
- Engineered **cancellation-safe sandbox execution** in [PR #407](#), propagating `AbortSignal` across Daytona, TFY, and local runtimes to terminate long-running commands without waiting for execution timeouts.

Collaborator

Jan. 2026 – May 2026

Oppia Foundation

Remote

- Expanded **strict TypeScript coverage across 25 files**, resolving nullability, typing, and test failures across two previously excluded file groups.
- Standardized **13 backend API response payloads** to the `*.dict` convention and updated frontend consumers and unit tests, removing inconsistent contracts across multiple domains.
- Eliminated runtime RTE configuration failures by building a **general-purpose linter** validating component configuration IDs against allowed constants at lint time, with comprehensive unit coverage.

Summer Intern

Jun. 2025 – Jul. 2025

Bharat Electronics Limited

Ghaziabad, India

- Modeled a real-time accident detection pipeline using **YOLO + DenseNet** on the KITTI dataset, achieving **88% accuracy**.
- Improved F1 score from **0.85 to 0.92**, reduced false positives by **18%**, and optimized inference to **180 ms/frame** for real-time road-scene analysis.

PROJECTS

OmniSprint | Coral, FastAPI, React, TypeScript, Python, Gemini API

May 2026

- Built a sprint-intelligence platform joining roadmaps, GitHub issues/PRs, and CI signals to detect blockers, stale work, regression risks, and deadline slippage.
- Designed cross-source retrieval across **6 SQL-queryable data surfaces**, grounding Gemini on focused project evidence for risk scoring and actionable follow-ups.
- Led OmniSprint to become a **3× hackathon winner**, including a **Top 50 finish in an International Hackathon by WeMakeDevs among 5,400+ participants**.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL, HTML, CSS

Developer Tools: Git, GitHub, Docker, Jira, Figma, Notion

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks

ACHIEVEMENTS

- Reached the **National Semi-Finals of Flipkart GRiD 8.0**, placing among the top **~1,000** from **170K+ registrations** nationwide (**~top 0.6%**).
- Placed in the **Top 100 at ZS Campus Beats 2026** among **2,600+ teams** (**~top 4%**) and received a **Pre-Placement Offer from ZS Associates**.
- Selected for **Amazon ML Summer School 2025** among **~3,000** candidates from **80K+ applicants** nationwide (**~top 4%**).
- Secured **Global Rank 57 in TCS CodeVita Round 2, 2025**, in a season attracting **537K+ registrations across 96 countries**.
